

# OSH Training in Virtual Reality

Innovative tools for conducting Occupational Safety and Health training

# 15+ VR Trainings available on the platform. NEW training every month!

Available in the Standard Subscription

## FIRST AID „BLS+AED“

The tasks set before us will be a huge challenge and an interesting experience. In the training you will learn how to deal with cuts, fractures, resuscitation, AED. The application is integrated with the phantom when performing compressions.

## FIRE PROTECTION „EVACUATION“

During the training you have a simple sentence to evacuate from the burning building. During the training, you solve a number of sentences thanks to this, you learn how a hydrant, fire extinguisher, oil works and what to do when you notice a fire. The application works great during fire training. but also for periodic and initial training.

## FIRST AID "BURNS"

You will learn 4 basic methods of extinguishing: snow extinguisher, powder extinguisher, hydrant, fire blanket, how to properly carry out first aid for burns, what dressing to choose and how to apply it, and what tools will be necessary, methods of estimating the extent of burns: a self-extinguishing method "Stop, droll and roll" you will learn which groups of fires the snow extinguisher is intended for.

## PRODUCTION HAZARDS SPOTTING

In the application, you play the role of an employee who enters the production area. There are many activities going on around here, working machines, workers, and forklifts. The player's task is to identify threats and perform actions that will eliminate the risk.

## FORKLIFT HAZARDS

You'll play the role of a young employee who goes to work. During the day you meet a rather annoying boss but also two friendly colleagues. You get 10 tasks to complete from your boss, while a lot is going on. Application covers the issues necessary to prepare the operator for admission exams.

Application made in cooperation with DHL.
